Net Positive: How Courageous Companies Thrive by Giving More Than They Take puts forward the concept of "Net Positive", which is aimed at assisting business leaders to carry out thorough corporate transformation. "I am happy to see the momentum of change in many industries. Now it is time for us to implement "Net Positive Action". I hope all the leaders here can walk with us."

Dr. Rebecca Lee

The world's first Hong Kong female explorer who has traveled across the three poles and the founder of the Polar Museum Foundation

The world's first Hong Kong female explorer who has traveled across the three poles and the founder of the Polar Museum Foundation, Dr. Rebecca Lee who received the SERA Honorary Fellowship said, "After twenty-six years of hard work, the "Hong Kong Jockey Club Climate Change Pavilion" was finally established on the campus of the Chinese University of Hong Kong in 2013 and exhibited the precious data, objects, videos and photos collected in the Antarctic, Arctic, Qinghai-Tibet Plateau, and Mount Everest snowy areas, which I hope could promote the awareness of climate change and environmental protection information to the public." Dr. Lee also pointed out that the earth's ecological environment is deteriorating. Especially since the outbreak of the global epidemic, humans have used a large number of disposable masks and plastic take-out boxes, which will cause greater pollution to the environment. We call on the public not to forget to protect the environment when fighting the epidemic.
